Company*

## bdi programs on-line

bdi educational lecture programs are now available on-line at no cost due to the generous sponsorship of **Novo Nordisk** and **Takeda**.

The Behavioral Diabetes Institute (BDI) regularly receives requests for patient programs, training materials and provider education from around the globe. But only those living in the San Diego area have been able to take advantage of BDI's innovative programs. Until now.

Today, we are pleased to announce that videos of selected BDI educational lectures for patients and healthcare professionals can be viewed online at [www.behavioraldiabetes.org](http://www.behavioraldiabetes.org).

**BDI will continue to add new video seminars throughout 2009. Check our website regularly for NEW educational video programs. And, of course, share the good news with your colleagues and friends!**

## anyone can view videos

of these programs on BDI's website at any time!

These video seminars focus on current behavioral health issues in diabetes, and feature specialists including Dr. Paul Ciechanowski, Dr. Lawrence Fisher and Dr. Ann Goebel-Fabbri. Although some educational lectures are designed for health care providers only, anyone can view videos of these programs on BDI's website at any time. There is no cost for downloading and viewing video lectures. Now, more than ever, BDI is able to provide support, hope and guidance to professionals and patients across the nation and beyond.
